

AD-8526 Ethernet Converter Instruction Manual

The AD-8526 Ethernet Converter can connect the RS-232C interface of a weighing instrument to the Ethernet (LAN) port of a computer that is not equipped with an RS-232C interface. By using the AD-8526, weight data from a weighing instrument can be managed with a computer connected to the network. The weighing instrument can also be controlled by the connected computer.
