

## Granite Surface Plates

**Material** Granite stone **Structure** Cut from virgin material

**Used Surface** Lapped finish

- Precision and rigidity conform to JIS standards (JIS B7513).
- Offers excellent wear resistance making it hard to scratch.
- Offers excellent corrosion resistance, and does not corrode readily.
- The bottom surface of the surface plate is fitted with a seat for a leveling jack.

■ **Special machining is also available.**  
Please consult us for details.

**Machining examples:** Tapped holes, steps, etc.

**Applications:** Base for liquid crystal and semiconductor-related fabrication units, base for high accuracy measuring units, base for high accuracy machining equipment, etc.
