

SERVICE CONDITIONS

Max. Pressure

Size 10A~40A: 34.3MPa (350kgf/cm²) Size 50A~80A: 24.5Mpa (250kgf/cm²)

Max. Temperature : 100°C
Material : Weld Steel
Seal : NBR
Back-up Ring : PTFE

Connection : Female Taper Thread (Rc)

FEATURES

- 1. The well-balanced pressure design stabilizes the thrust load caused by the high-pressure fluid inside and prevents so that excessive load is not added to the bearing.
 - They endure extreme pressures and provide stable operation with little rotary torque fluctuations due to pressure.
- 2. Large mechanical strength due to an <0-ring> with special backup ring used in the seal section and 2 <radial ball bearings> contained in the bearing section.
- 3. Maintenance is easy, with simple structure and <0-ring> and <backup ring> being the only consumables.

APPLICATIONS

This joint is suitable for movable piping of various kinds of hydraulic machinery.

Use the joint especially to the part of high pressure, frequent movement or to the part where the service life of the joint currently in use is short.

DESCRIPTION OF SRK series:Example for placing order

Type→Style No.→Size

SRK→2/3→10A/15A/20A/25A/32A 40A/50A/65A/80A

Example: SRK-2 25A

- * FKM seals are available for higher temperatures or chemical products.
- * Flange-type joints (SRK-2F and 3F) can also be manufactured upon request. Please inform the flange specifications.

DIMENSIONS OF SRK series

Nominal Size		Α	В	O	ם	ш	H	Fı	F2	G
